

Shade - Specification Sheet
by Paul Cockledge, 2014

Mounting	Free Standing
Lamp (Bulb) Description	1 COB LED - 3240lm - CRI83 - 30W - 2700K
Environment	Indoor - Dry Location
Finish	Black
Technical and Product Description	SHADE floor lamp providing diffused light.

Shade redefined the word "lampshade"; and its fixed perspective and is an effortless way to have warm ambience light with a touch of surrealism.

The magic of Shade is achieved by avoiding the conventional way of using mains power from the ceiling, and with it intrusive fittings and flex. Instead, power derives from an LED floor fitting shining an uplight into the paper shade, which in turn is suspended from the ceiling with next-to-invisible, capillary-thin wires. Paul Cockledge adds: "Shade has an almost dream-like mystery. It utilizes floor and ceiling both, but appears unconnected to either...!"

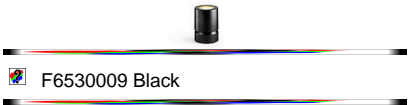

Diffuser in foldable paper with floor light source in black aluminum

Electrical

Voltage	120
Switching	Footswitch button w/ dimmer
IP Rating	IP20

Physical

Construction Material	Aluminum, Paper
Weight	5.5 lbs

Dimensional Image
