Technical and Product Description	Part of the Glo-Ball Series, the Glo-Ball C/W Zero was first designed in 2009 and has been in production since then. The concept behind the Glo-Ball series design is to achieve maximum diffusion of light through simple, functional and creative construction. The contemporary lamp has a diffuser that consists of an externally acid-etched, hand-blown, flashed opaline glass and a die-cast aluminum threaded ring nut with alodine plating finish. Glo-Ball C/W Zero is available with or without a dimmer switch. Inspiration Behind the Design: The decorative lamp designed by Jasper Morrison is made to resemble the bright glow of the full moon on a clear night when illuminated. Take a look at the entire family of Glo Ball Series lights.
