Finish	Matte Black

Technical and Product Description The next chapter in the story of a successful launch: the unique design of InfraStructure EVO by Vincent Van Duysen evolves with new light elements that allow for dramatic, yet subtle improvements in the versatility of the original. The advanced connection system now combines both vertical and horizontal components to create three-dimensional configurations in infinite variations with a linear, disc, and cone-shaped modules, allowing the designer to move up, down, or diagonally with light.
